Where Are These Things? Prepositions Of Location

Play a game of Achi.

The board game and counters are on pages 4 and 5.

The photos for the game are below.

Directions: The objective of the game is to align the one's counters in a horizontal, vertical, or diagonal row of three. Each student receives 4 colored counters. Cut them out at the bottom of pages 4 and 5. Student B chooses a square where he/she would like to place a counter. Student A asks the question in the square. The questions are about the photos on this page. Student B looks at the photos and then answers the question. If student B answers the question correctly, he/she places a counter in the square. The students take turns doing this until one of them has formed a row of three, or until all of the counters have been placed on the board. If all of the counters are on the board and no one has formed a row of three, the students can move their counters along the lines into an empty spot to continue the game.
